

New and Improved!

HOME BANKING (CU-ONLINE) & BILL PAY

When you log on you'll notice new user-friendly features and security enhancements. The enhancements you'll notice include these features:

HOME BANKING

- ☒ When you enter your member number on the login screen, it will be encrypted, meaning you will not be able to see your account number when typing it. Your security question's answer will also be encrypted.
- ☒ Your random code and security key will be arranged differently.
- ☒ You can sort on any item that has up and down arrows.
- ☒ You will have a new search button. Click on "Just Ask" to find specific areas within home banking.
- ☒ Any quick links that were listed on the side panel will now be listed under an individual item.
- ☒ You can hover over any menu item to view their drop-down list.
- ☒ The timeout default has been adjusted and we've added a 'refresh' button so you have extra time if you need it.

BILL PAY

- ☒ Within the **Schedule a Payment screen** and **Account screen**, you will see a **Payment Preference Button**. This allows you to set a default "pay from" account. So if you select 0210 - Checking Account, every time you pay a bill, that account number will always display as the default.
- ☒ Another change in the Bill Pay area is that the Scheduled Payments and Bill Pay history are now on separate screens.

These and other enhancements were designed for easier use and navigation of both CU-Online and Bill Pay. If you have questions, please give us a call at (715) 842-5693.
