

How to access mobile banking

Web address is <http://mobile.fwccu.com>

- How you access mobile banking will depend on the type of phone that you have.
- Your mobile service must allow access to the internet.
- Members with older types of phones such as flip phones will have less functionality than those members with I Phones or Droids.
- Members with I phones or Apple products such as an IPAD will need to download the Apple Safari browser to access mobile banking.
- Members with Droids/smart phones can access using the Mobile Mozilla Firefox browser.
- Mobile access provides the same encrypted security that our current internet banking systems utilizes. It is not an application rather a secure internet connection.

Phones such as a flip phone will be able to do the following:

- Obtain balances, review history
- Transfer from one suffix to another within the same account
- Check to see if a check cleared
- Find branches and ATM's
- Check Images of cleared checks

Smart Phones, I Phones and Droids have the following functionality:

- Account Alerts
- Obtain balances, review history
- Transfer from one suffix to another within the same account
- Check to see if a check cleared
- Find branches and ATM's
- Check Images of checks that have cleared
- Create recurring transfers
- Pay bills
- Set up payments
