

Verified by VISA

Protection for Your LCU VISA Credit and Debit Card

Now you can create a password that protects you when you buy online. Introducing **Verified by VISA**, a new security program that helps ensure that only you can use your LCU VISA card to buy online. Once you've activated a password for your card, no one else can use your VISA card number at any participating online stores without your personal password.

No New Card Required: Verified by Visa is designed to protect the LCU VISA card(s) you already have. All you need to do is go online and visit the secure Verified by VISA website to activate a password. If you and your spouse have the same account number, each of you will select a personal password for your own card.

Use it from any computer. One of the great advantages of Verified by VISA is that it works with just about any device with an Internet connection. There's no special software to install. Once Verified by VISA is activated in your card, you simply shop like normal - and your VISA card number is automatically recognized at checkout. When you activate Verified by VISA, look for details from your Visa card issuer for specific browser and operating system information.

Just minutes to activate. Begin, log on to <https://usa.visa.com/personal/security/vbv/index.html>. Click on the Verified by VISA logo to get started. Before proceeding to the password selection page, please take a moment to read the Q&A to understand the security precautions and levels of encryption VISA uses on its web site to ensure your information is protected. As with any online site, it is wise to read the Privacy & Security policies.

You Are Your Best Source of Security. Remember, you can help maintain your account security by keeping your password and other personal identifying information confidential and maintaining control of your credit cards. Keep a copy of credit card numbers in a secure place, plus the phone numbers to report them lost or stolen. Photocopies of the front and back of the cards often work well for this purpose. Compare receipts with your statements and report any unusual activity promptly.
