

## Security Statement

### Central Macomb Community Credit Union Security

Central Macomb Community Credit Union ensures the accuracy and security of any data that is transmitted to us using our secure forms. Digital encryption technology utilizes a long set of codes to scramble and then decode information. A digital key is simply a very special number or group of numbers that is carefully chosen to have certain mathematical properties. Depending on the encryption algorithm being used the key may be a large random number or a set of related numbers. These keys are the basis of on-line identity verification. Once information has been scrambled using the public set of codes for Central Macomb Community Credit Union, the only place they can ever be decoded is on our Secure Server. This data is not shared with or sold to any other institution or group.

Another very important part of this technology has to do with secure browsers. Most modern browsers easily handle encryption codes, however if you are using an older version of the software, it would be wise to upgrade now. Then you know you have the best security protection available. To test your current browser, see the information below. There are several ways to tell if the security is working.

- A small window may pop up to tell you that this is a secure link and do you want to continue...
- When it does switch over to a secure link, **look** at the link address up in the location window of your browser. Instead of the usual `http://` you will notice that it has changed to `https://`. The 's' denotes Secure Mode. If that does NOT show up, you are not in secure mode.
- Most browsers also have a small graphic that will pop up and stay in the lower right hand corner of the browser window to denote that you are browsing in a secure mode. A picture of a lock, similar to the one used in our secure graphic, is a good example.

Please note that *emails are not secure transmissions* so remember never to send account numbers, social security numbers or any other information you would like to keep private to Central Macomb Community Credit Union or anyone else in an email message.

If you visit a secure site, such as home banking, you will be asked for personal identification numbers which will give you access to the "member only" section of our website. This information enables the credit union to regulate entry to the member only portions of our website and to measure member usage. Any identifying information gathered is not sold to third parties.

### External Links

If you link to another site from any of our pages, you are leaving our site pages, and we cannot be held responsible for any information that may be gathered at a linked site. We make every effort however, to ensure that all linked sites follow similar privacy policies as ours to offer you maximum security and privacy.
