

Remote Deposit Capture

Save Time & Money

How does it work?

Remote Deposit Capture allows companies to convert paper checks into electronic deposits. Deposit your checks from your desktop! Business checks, government checks, even money orders, can all be deposited electronically. Save time and money daily. If you collect checks

at multiple locations, deposits can be made from each location and processed on the same day. Minimize your mail time and courier costs.

Property management companies, utilities, insurance agencies, or any company with a large volume of checks or distributed collection

points will love this service.

Remote Deposit Capture gives you the ability to:

- > Deposit paper checks electronically
- > Accelerate your cash flow
- > Minimize write-offs
- > Generate useful management reports

Why should my business use Remote Deposit Capture?

- > Eliminate trips to the bank
- > Check verification services available
- > Make same-day deposits from remote offices
- > Archive images on secure servers for instant retrieval anywhere
- > Speed your cash flow by depositing your customers' money more quickly

How does Remote Deposit Capture reduce your costs?

- > Accelerate your cash flow by decreasing your accounts receivable
- > Save labor hours associated with manually updating receivables, handling paper checks, driving to the bank, and researching past payments
